

Red Condor's Hosted Service

Stop Spam Today with Red Condor

Red Condor's Hosted Service provides unsurpassed email security against internal and external threats such as spam, viruses, spyware, phishing schemes, identity theft, and other dangerous and offensive content. There's no software or hardware to install. Our technical experts do all the work, and you get the best email protection available. The Hosted Service is great for small organizations without an IT staff and also well-suited for larger enterprises and public agencies looking for a managed email solution.

Fully Managed Service: With Red Condor's Hosted Service you don't have to lift a finger to get world-class email protection. We do all the work for you, and there's nothing to install or maintain. You simply redirect your email to our servers, and we filter it before sending it on to you. And, we'll ensure that any legitimate emails don't get accidentally marked as spam, so you won't lose important email.

Perimeter Defense: Red Condor's Adaptive Threat Detection™ technology provides perimeter layer protection from denial of service and other email service attacks. Merit-based reputation and real-time analysis of evolving email threats combine to stop the most abusive email attacks and block spam campaigns before they even enter the network.

Advanced Spam and Virus Protection: Red Condor's multi-layer spam filter technology eliminates fraudulent and predatory email based on absolute criteria that results in decisive action. Real-time knowledge gathered from our worldwide sensor network is used to create tens of thousands of targeted filter rules that eliminate spam and viruses while keeping end user email private and secure. In addition, multiple signature-based anti-virus engines are used with Red Condor zero-hour virus defense to create protection that is both quick to respond and provides in depth defense. Optional outbound spam and virus filtering is available.

End User Spam Management: A Personal Dashboard allows each mailbox owner to refine policies and review quarantined spam. Each user can receive a Spam Digest report, providing visibility to the effectiveness of his individual filter profile.

Administrator Management Tools: Hosted Service incorporates an intuitive Web dashboard that makes managing email security simple. Domain administrators can easily set email filter policy and monitor filter performance from a powerful, graphical interface.

Red Condor's Hosted Service also includes:

- Disaster recovery protection for up to 96 hours
- Proactive monitoring by Red Condor
- Real-time rule updates that keep pace with fast-breaking spam & virus campaigns
- 24 x 7 x 365 customer support by email experts
- Optional outbound spam and virus filtering

Red Condor's Hosted Service

Service and Support by Email Experts:

Red Condor provides 24x7 technical service and support for our Hosted Service. Security analysts and networking experts monitor email threats around the clock and proactively take action to ensure service continuity for all Red Condor protected domains and email users. And, our experts are available for implementation and configuration of your Hosted Service, ensuring all aspects of the service experience are made simple.

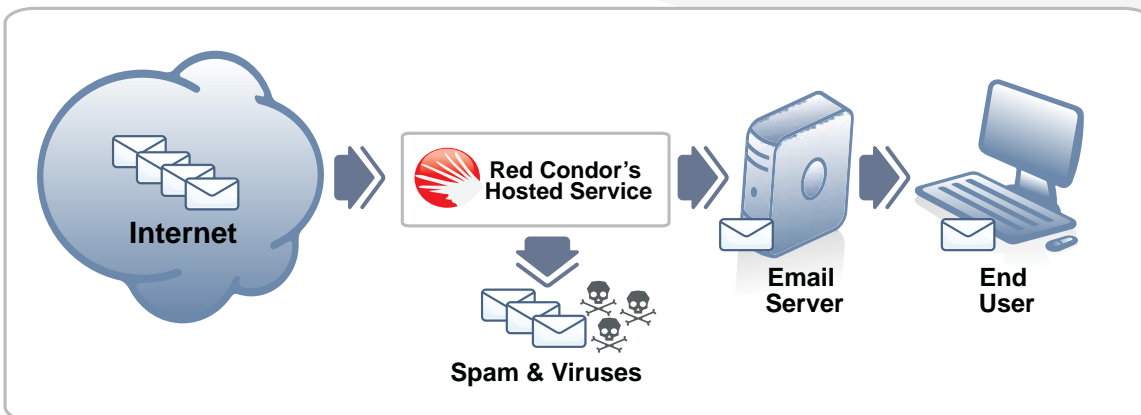

Disaster Recovery: Hosted Service comes with 96 hours of disaster recovery protection. When disaster strikes – or even unplanned maintenance – Red Condor continues to accept incoming email and spools filtered email for later delivery to the mail server.

Bandwidth Savings: Red Condor's Hosted Service frees up your internet connection. Spam traffic can eat up enormous amounts of bandwidth – in some cases, up to 80% of a typical connection. By re-routing your incoming email to our hosted data centers, Red Condor takes the brunt of any spam assault, and passes only the good email on to you. Your internet connection is no longer inundated with spam, and you have more bandwidth available for other internet based applications.
